

1 **ABSTRACT OF THE DISCLOSURE**

2 A paper container includes a base disk and a peripheral wall having a ledge
3 extending from a bottom edge of the peripheral wall to engage with a bottom face of the
4 base disk, a side wall integrally formed adjacent to the ledge and having an inner surface
5 to engage with a peripheral edge of the base disk, a knurl formed between the ledge and
6 the side wall for engagement with a surface and a lip ring formed on a top edge of the
7 peripheral wall such that an annular space is formed between the base disk and the
8 peripheral wall.
